Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims, the cited prior arts fail to teach the configuration circuit includes a function of releasing an internal reset signal on completion of configuration operation, as recited in amended claim 2; the cited prior arts also fail to teach a terminal which indicates completion of the configuration operation by the configuration circuit, the semiconductor processing device further having a function of initiating a peripheral semiconductor device through the terminal, as recited in amended claim 4; the cited prior arts also fail to teach wherein the nonvolatile memory comprises a flash memory; the cited prior arts also fail to teach the configuration circuit has a function of reconstructing, during operation of the central processing unit, part of the logic building data in SRAM-type field programmable logic array which has been transferred from the nonvolatile memory, as recited in claim 6; the cited prior arts also fail to teach wherein the configuration circuit has a function of selecting logic building data in the nonvolatile memory in correspondence to the terminals and transferring the selected data to said SRAM-type field programmable gate array, as recited in claim 8; and the cited prior arts also fail to teach the configuration circuit includes a function of selecting logic building data in the nonvolatile memory in correspondence to the data in the register and transferring the selected data to the SRAM-type field programmable gate array, as recited in claim 10.
2. Claims 2-11 are now in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
